

Aluminum stand for Wally 32 hydroponic system

The Wally32 Hydroponic System Stand Kit includes everything needed to assemble the stand.

To make assembly easier, it is suggested to utilize a rubber mallet for inserting the aluminum profiles into the plastic angles.

A screwdriver is required to secure the screws.

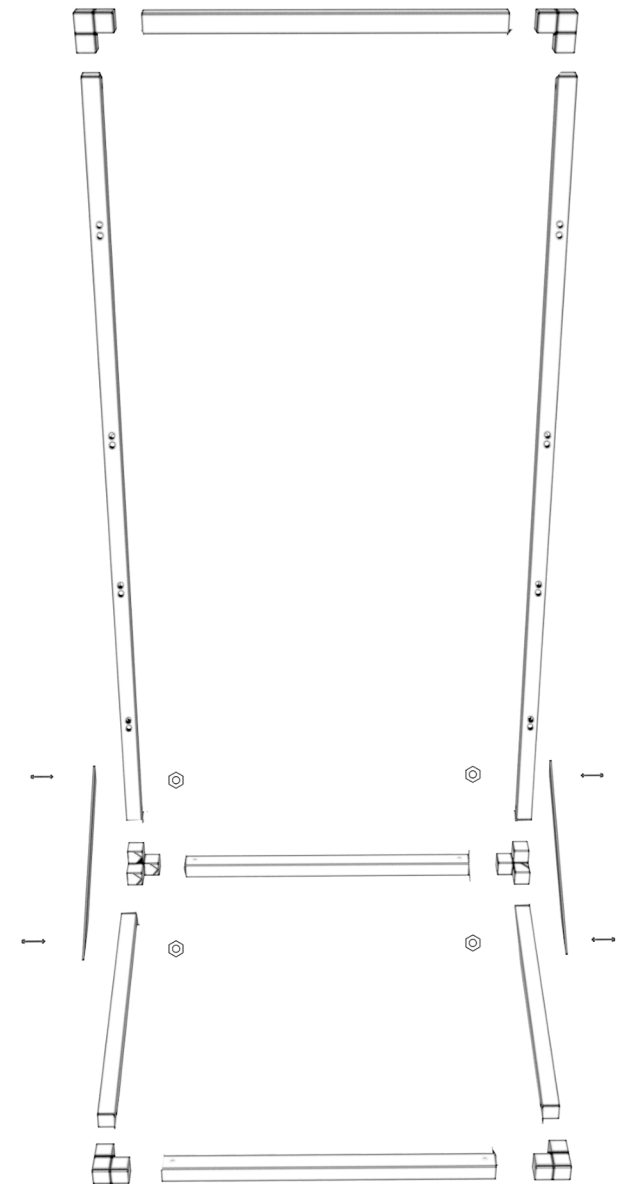

Please note that the metal hangers are not included in the stand kit and are part of the Hydroponic System.

The stand kit comes with

- 2 Aluminum rods, 180 cm in length
- 3 Aluminum rods, 60 cm in length
- 2 Aluminum rods, 40 cm in length
- 3-way plastic angle connectors*2
- 2-way plastic angle connectors*4
- 4 long Bolts and nuts for securing side bindings
- 2 Aluminum bindings
- Bolts and nuts for the hangers

Assembly steps

- 1 Assemble the stand base components into a rectangular frame
- 2 Join the rear components of the stand
- 3 Secure the base of the stand to its back
- 4 Fasten the binders with the accompanying screws and nuts
